INNOVATION

Let's start by defining what innovation is . Innovation is the process of creating something new to make our lives better. Innovation is only possible with passion. Innovators see the world differently. It requires a set of crosscutting practices and processes to structure, organize, and encourage it. Innovation starts with a new idea. It could be a plan for an improved product or service; it could be an updated method for running your application.

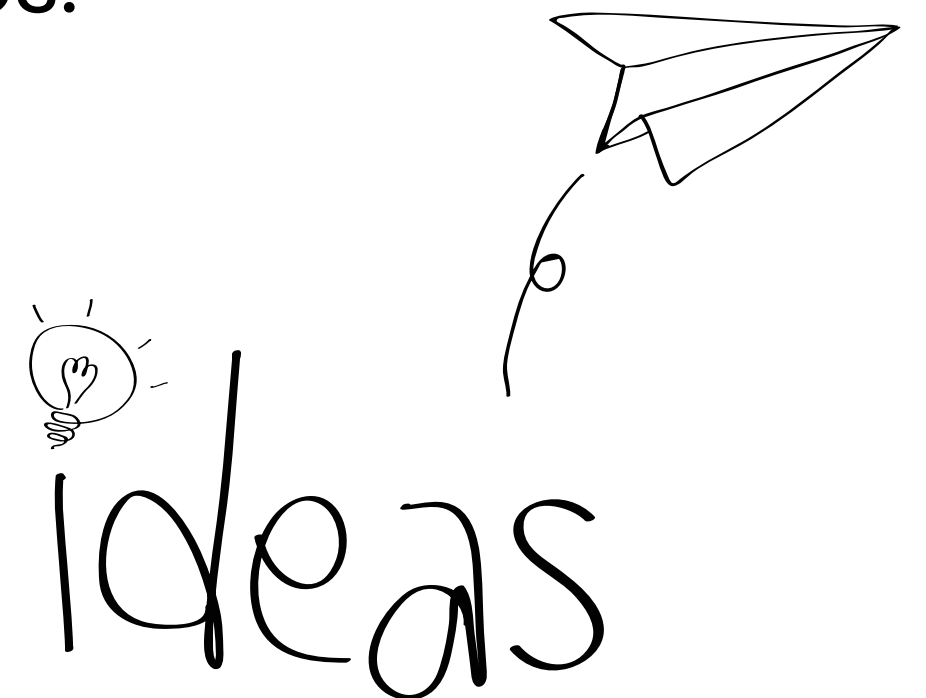

MAIN IDEA

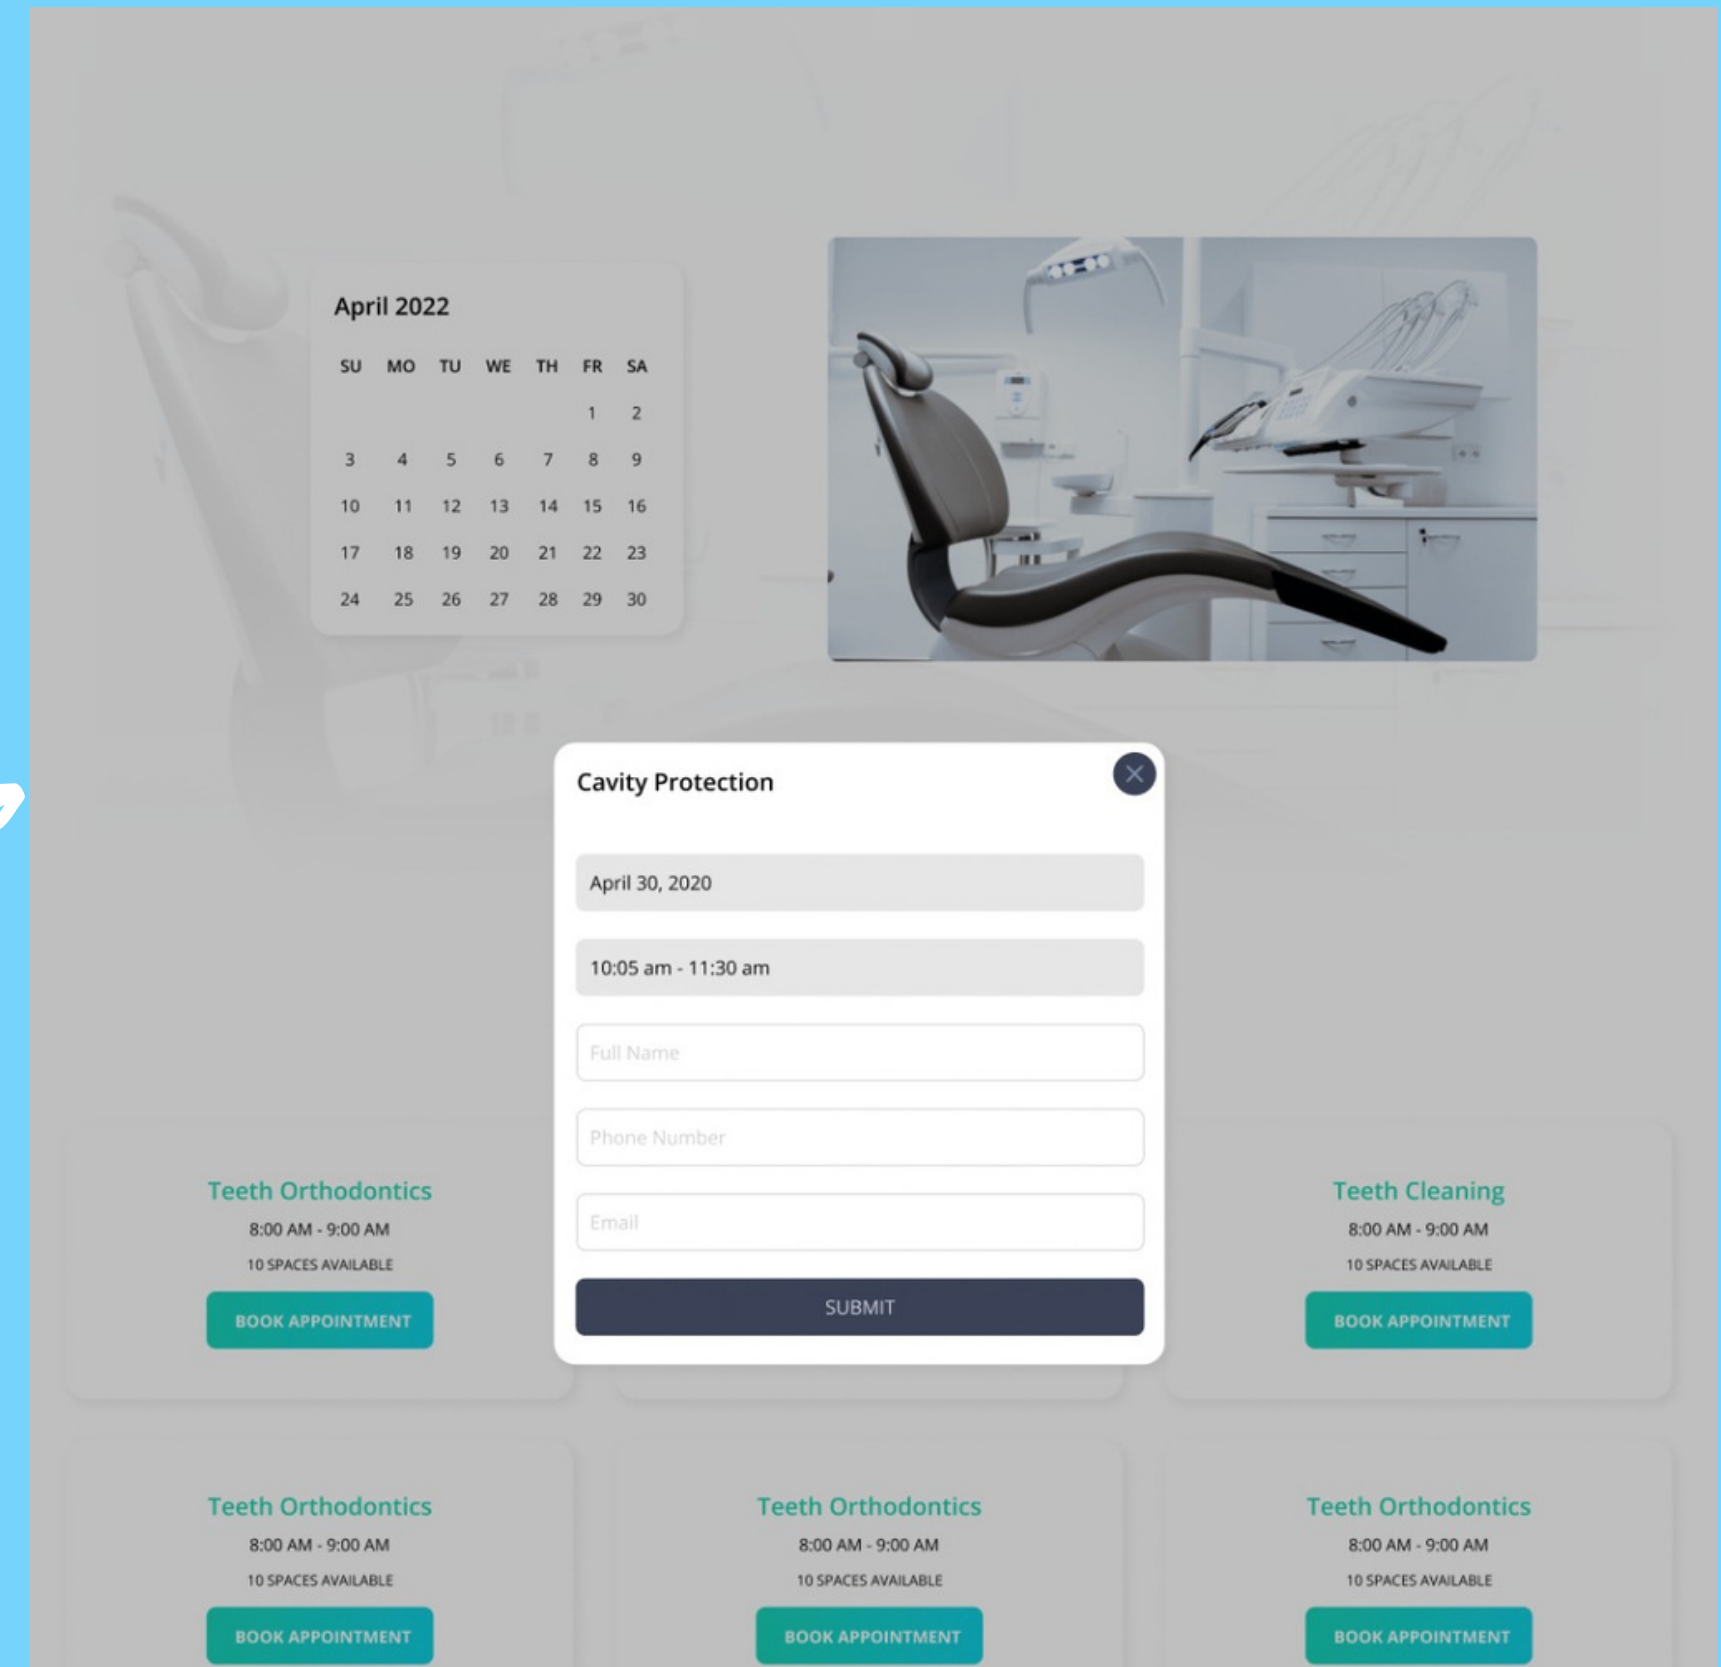

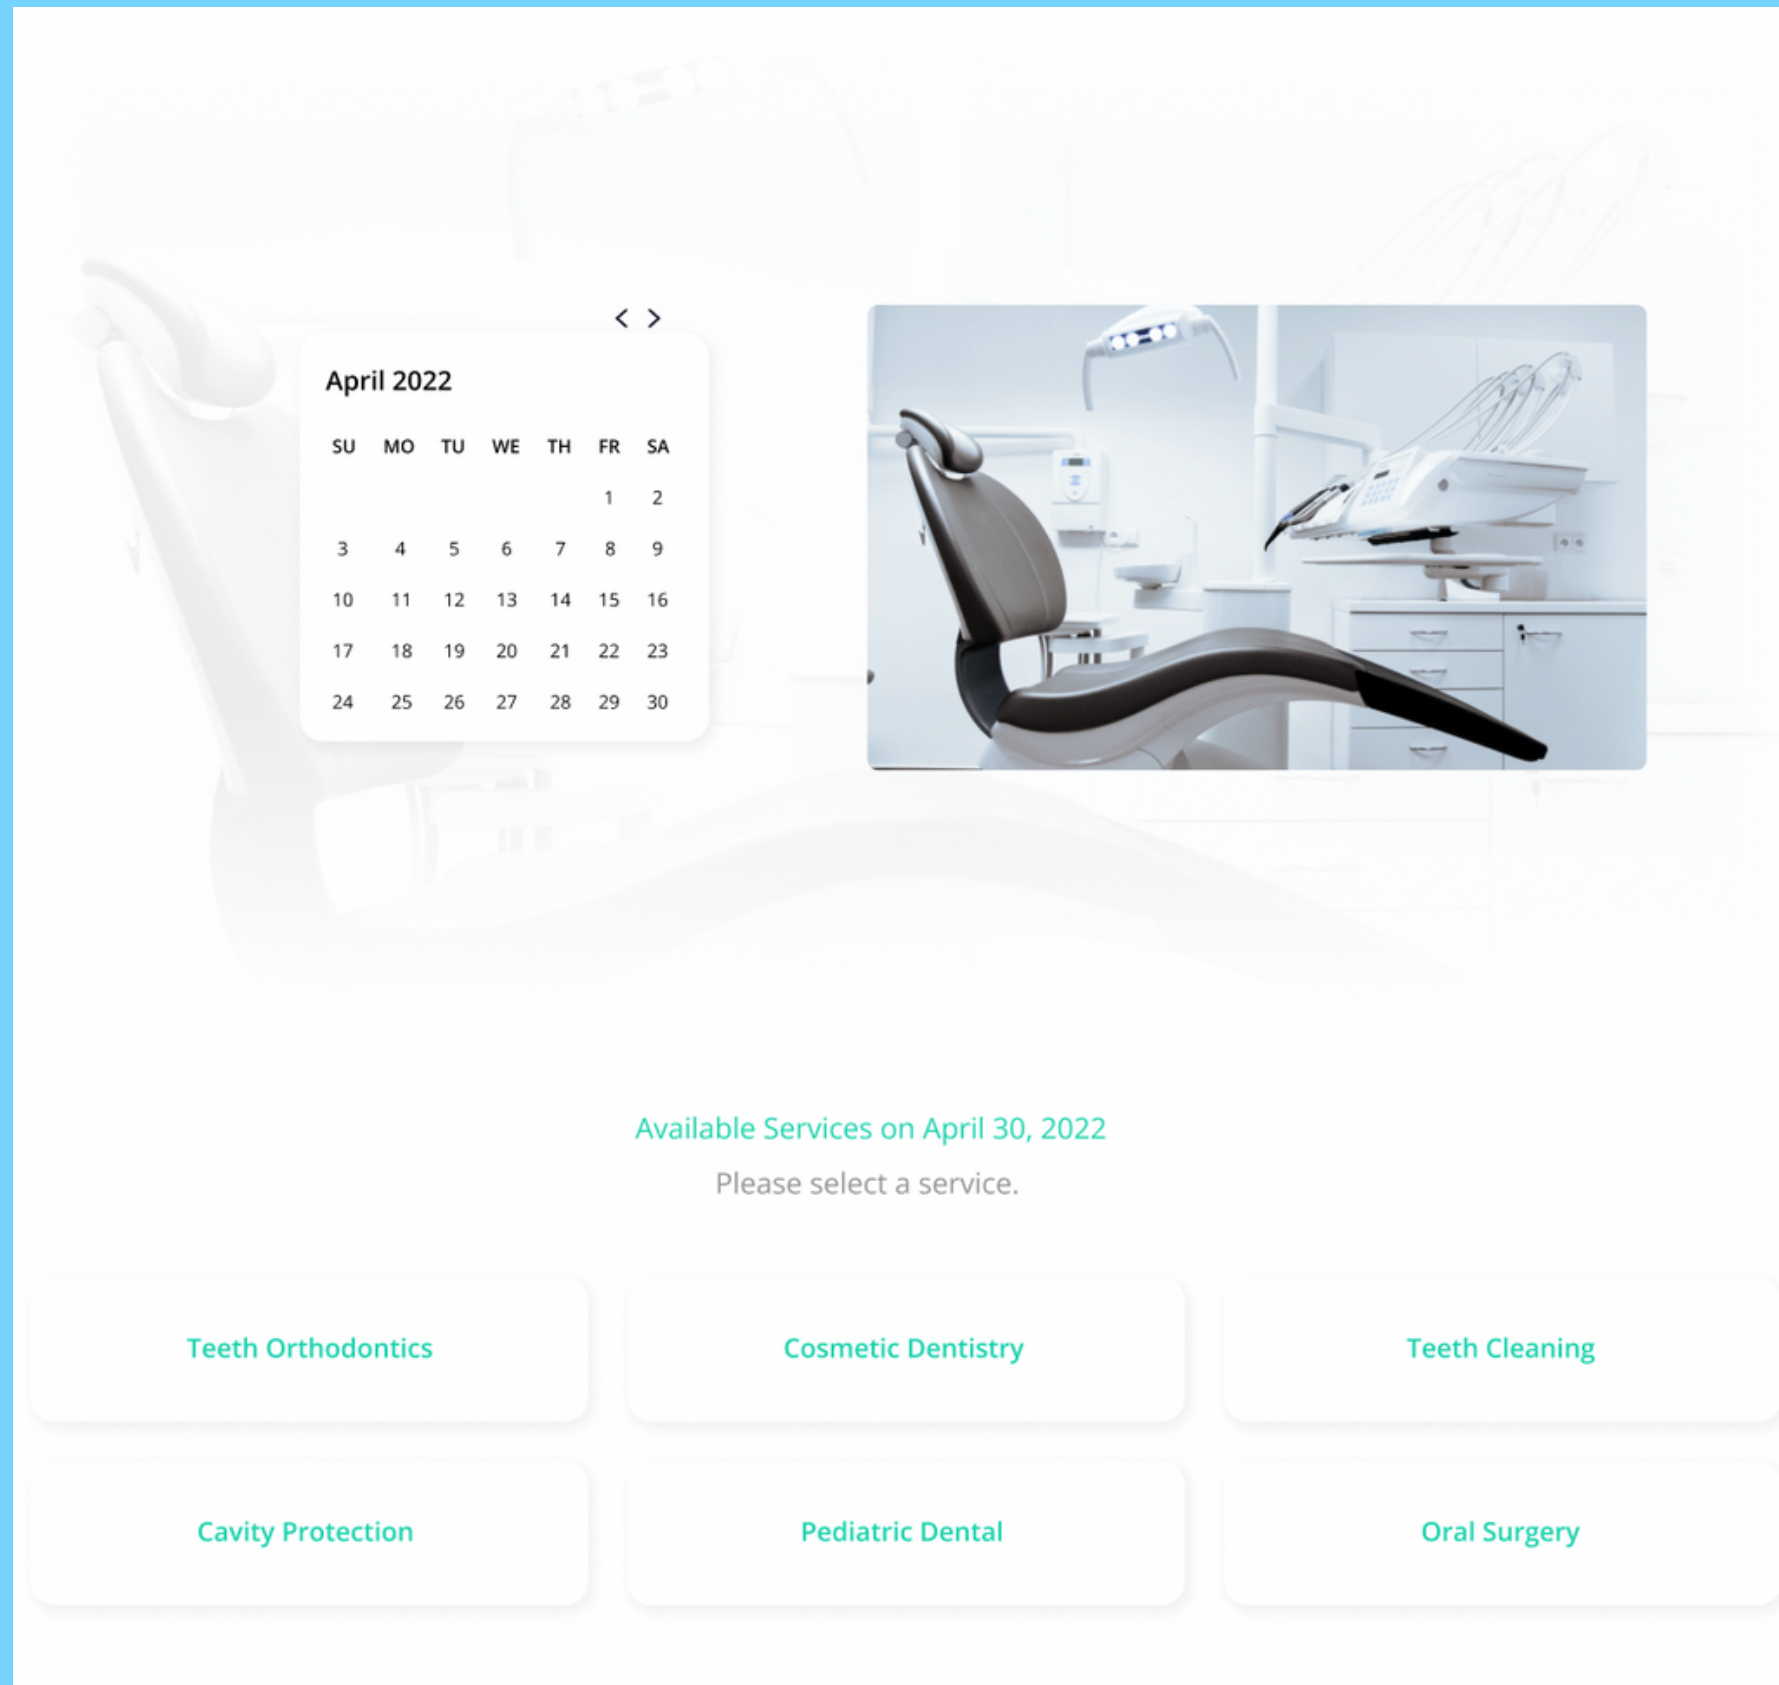

We here propose a doctor patient handling, managing system that helps doctors in their work and also patients to book doctor appointments and view medical progress. The system allows doctors to manage their booking slots online. Patients are allowed to book empty slots online and those slots are reserved in their name. The system manages the appointment data for multiple doctors for various date and times. Each time a user visits a doctor his/her medical entry is stored in the database by doctor. Next time a user logs in he may view his/her entire medical history as and when needed.

At the same time a doctor may view patients medical history even before the patient visits him. This allows for an automated patient doctor handling system through an online interface. Our system also consists of organ donor module. This application will allow for organ donation registration as well as organ search. The application will be design to help urgent organ requirements through easy/instant searches.

PROTOTYPE

How Did We Make It

1. Planning the Project.
2. Holding a kickoff meeting.
3. Defining roles and responsibilities.
4. Defining project scope and timeline.
5. Setting and prioritising goals.
6. Compiling the project plan.

WEBSITE OUTPUT

- The site will outcast the appointment time along with the doctor available.
- Patient input their required doctor and its department, the website will automatically list the slot availability.
- Users / patients can book their slot on prior basis.
- Doctor and patient will have different login portals .
- Along with booking slot this website will also provide the information about organs , blood etc for the required patient.

Benefits

- Appointments go directly into your diary.
- Quick and easy for patients.
- Improves the patient scheduling journey.
- Converts new prospects easily.
- People can attach files of their issue.
- “Always On” Service
- Better Security

**THANK
YOU!**
